

## SimpleRisk Release Notes

(20221013-001)

If you are not already running SimpleRisk, then you will need to [DOWNLOAD](#) it and follow the instructions for your chosen installation method. If you are currently running a previous release of SimpleRisk, then you will need to go to your Configure menu, select Register & Upgrade, and then click the “Upgrade the Application” button. This will run both the application and database upgrades to move you to the most recent release.

**The complete list of changes for this release is below:**

### SimpleRisk Core

#### **New Features**

- Added the ability to associate a Framework with an exception. Choosing a framework will limit the controls you can select to ones belonging to that framework.

#### **Security**

- Began changes required to bring PHP 8 compatibility. This effort is not complete and will complete on the following release.
- Added selectize.js via Composer
- Removed the old js/selectize.js file
- Removed the unused HighCharts adapters under js/adapters
- Removed the unused jquery.tree library
- Removed the unused js/angular files
- Removed the unused files under js/old
- Removed the unused jquery.tablesorter.js library
- Removed the unused [jquery.ba-throttle-debounce.min.js](#) library
- Removed unused controller files under js/controller
- Moved a number of SimpleRisk javascript files under js/simplerisk for easier tracking and updated the files linking to them
- Updated the Content Security Policy to include a missing entry for connections to [olbat.github.io](https://olbat.github.io)

#### **Usability**

- Updated the submission logic for the Document Program. Users tab selection will be remembered after submitting a form.
- Updated the default state for "Check Case Sensitivity for Usernames" to false.
- Updated failed login error message to use the language set for SimpleRisk.

#### **Bug Fix**

- Fixed an issue where column filters would not be shown on the Dynamic Risk Report
- Fixed an issue where tags would not be displayed while editing assets.
- Aligned the define exceptions edit and delete buttons.
- Fixed an issue preventing the Dynamic Risk Report functioning on MySQL 5.7.

- Fixed an issue where users with a risk matrix smaller than 5x5 would receive an error when viewing risk details.
- Fixed an issue where the associated risks field would not display all entries when there was a high volume of risks present.

### **SimpleRisk Extras**

#### **Customization**

- Fixed an issue where the printable view of a risk would show fields that customization has currently disabled.

#### **Other Notes**

- A SimpleRisk user noted that they were having difficulty logging in with the default username of “admin” with password of “admin”. Upon investigation, it was discovered that PHP was enforcing secure cookies, but the application was not using SSL, so the session values were not set. This may be an isolated instance, but if you experience this issue, try installing a SSL certificate and run SimpleRisk over HTTPS to fix it.
