

SimpleRisk Release Notes

Version: 20250828-001

If you are not yet running SimpleRisk, please download it and follow the installation instructions for your chosen method. If you're currently running a previous release, go to the Configure menu, select Register & Upgrade, and click Upgrade the Application. This will upgrade both the application and database to the latest release.

SimpleRisk Core

Bug Fixes

- Fixed an issue where the registration had caused the Upgrade Extra to attempt to download on hosted instances.
 - Fixed the fatal error for display_artificial_intelligence_icon
 - Fixed an issue where the 20250411001 upgrade could fail
-

Other Notes:

- A user reported difficulty logging in with the default username "admin" and password "admin". Investigation revealed that PHP was enforcing secure cookies, but the application was not

using SSL, preventing session values from being set. If you encounter this issue, try installing an SSL certificate and running SimpleRisk over HTTPS to resolve it.
